

COGNEX

Advanced machine vision made easy

High-speed, high-resolution line scan camera with built-in AI

In-Sight 3800 Line Scan Series

Unmatched accuracy and speed for complex manufacturing inspections

In-Sight 3800 Line Scan Series

The In-Sight 3800 Line Scan is a high-speed, high-resolution camera designed for demanding industrial manufacturing applications. With advanced AI capabilities and ultra-fast processing, it effectively detects even the smallest features and defects at line speeds. This vision system excels in performing detailed inspections on **continuous webs, cylindrical surfaces, large parts, and parts with complex shapes and patterns.**

Key Features

- **AI Capabilities:** Improve quality control with AI-powered defect detection
- **High-Resolution Imaging:** Detect even the smallest defects and features to ensure product quality and reduce the risk of costly errors
- **High-Speed Processing:** Maintain high throughput with 3X faster* image acquisition and tool processing
- **Stable Lighting and Detection:** Get more consistent results with uniform illumination that reduces shadows and glare to provide clearer images
- **Fully Embedded Solution:** Experience easy integration and simplified operation with a compact, space-saving design that requires no PC

*Compared to previous generation system

Application examples

Optical character recognition (OCR): Extract and read text, such as lot codes and expiry dates, from rotating or curved surfaces for accurate product tracking and compliance.

Defect detection: Identify coating voids on fast-moving, continuous materials, ensuring high-quality standards for printed media and other substrates.

Inspection of large parts: Distinguish between good and non-conforming material on parts that are too large to be imaged with an area scan camera.

Measurement: Unwrap and measure circular or curved parts, ensuring precise dimensions for proper functionality and fit.

Barcode reading: Accurately decode barcodes on large parts for reliable traceability throughout production.

Continuous web inspection: Segment spot defects on continuous web materials to find and correct quality issues during the manufacturing process.

Line scan vs. area scan technology

Line scan

Builds the image line-by-line as the object moves past the sensor, ideal for inspecting fast- or continuously-moving objects

- **Use case:** Inspecting continuous materials (e.g. webs, textiles), cylindrical objects, complex surfaces, and large parts

Area scan

Captures the full image in a single snapshot, ideal for inspecting static or moderately moving objects

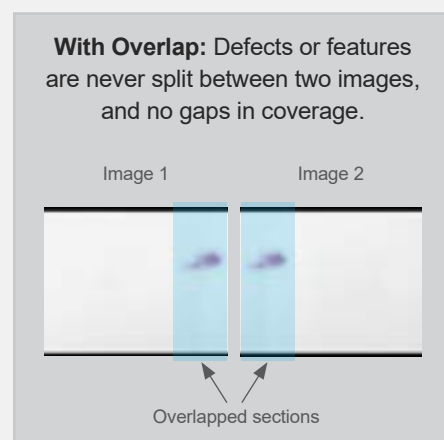

- **Use case:** Inspecting parts on a production line where items are stationary for short periods

Elevate quality control with image overlap technology

The In-Sight 3800 Line Scan captures overlapping sections of objects during inspections for complete coverage and more detailed images.

- **Improved Accuracy:** Overlapping images ensure every part of the object is inspected, minimizing missed defects.
- **Seamless Inspection:** Ideal for high-speed production lines, ensuring no areas are skipped due to fast movement.

Complete vision toolset solves tasks of any complexity

The In-Sight 3800 Line Scan integrates AI and rule-based tools into a single vision system, making it flexible enough to handle a wide range of error-proofing applications. Use the tools individually for simple tasks or combine them to tackle more complex automation challenges.

AI tools

The In-Sight 3800 Line Scan uses AI-powered edge learning tools to process images directly on device and deliver accurate results in real time. With example-based training and no experience needed, these tools offer high ease of use and fast deployment.

Segmentation: Extract defects, regions, and objects from complex parts and backgrounds.

Classification: Detect and sort parts based on multiple features or characteristics.

Optical character recognition (OCR): Read characters on reflective, low-contrast, and non-flat surfaces, including multi-line text.

Rule-based vision tools

The In-Sight 3800 Line Scan is also embedded with an extensive library of industry-proven traditional vision tools and algorithms including: Measure Distance, Pixel Count, Count Patterns, Math and Logic Tools, and more.

Spreadsheet environment facilitates deployment of advanced applications

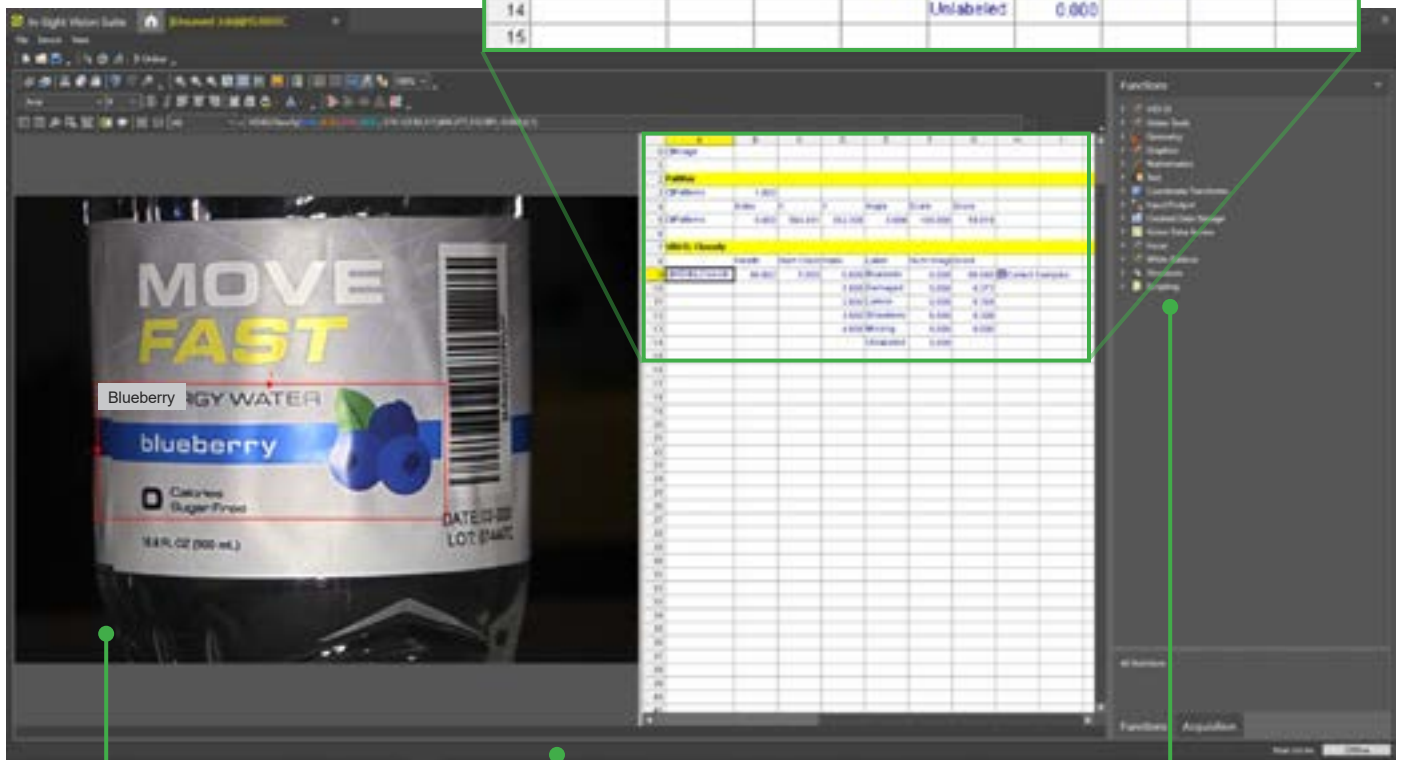

The In-Sight spreadsheet interface allows you to quickly set up and run jobs without the need for programming. This robust development environment provides you with the flexibility to make critical adjustments to job parameters, so you can adapt your applications as your requirements change.

Spreadsheet guides users through advanced applications

The In-Sight spreadsheet interface allows you to quickly set up and run jobs without the need for programming. This robust development environment provides you with the flexibility to make critical adjustments to job parameters, so you can adapt your applications as your requirements change.

Easily review and recall files with image playback

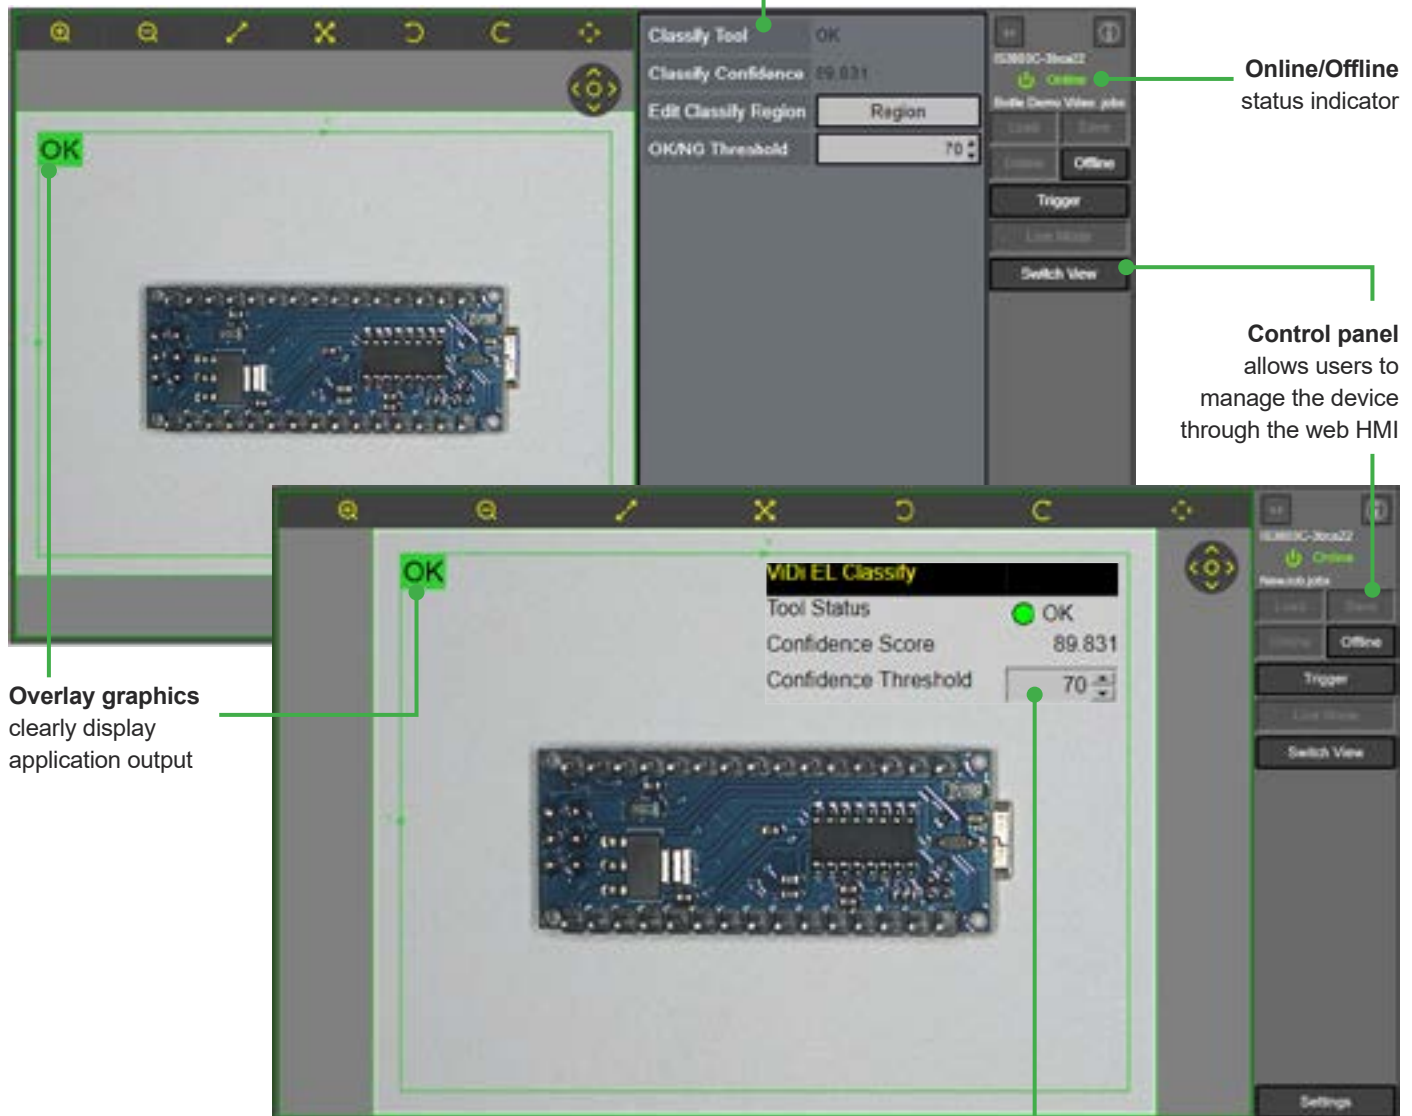

Full I/O and communications function set streamlines factory integration

Full suite of AI- and rule-based vision tools

Web-based HMI offers real-time application testing and optimization

The In-Sight 3800 Line Scan provides access to a web-based human-machine interface (HMI) that enables runtime visualization. From the HMI, users can view inspection results and modify setup parameters to optimize their application.

EasyView displays tags from jobs in a simplified format

Full-featured vision system solves wide range of applications

The In-Sight 3800 is engineered with the entire suite of innovative Cognex vision tools and convenient features that deliver fast, reliable automation.

In-Sight 3800 Line Scan Series Specifications

Image Sensor	1K Mode	2K Mode	4K Mode
Bit Depth	8-bit monochrome	8-bit monochrome	8-bit monochrome
Line Rate (Maximum, Full Resolution)	87 kHz (11.5 μ s per line)	169 kHz (5.9 μ s per line)	84 kHz (11.9 μ s per line)
Sensor Type	1" CMOS	1" CMOS	1" CMOS
Sensor Properties	14 μ m x 14 μ m square pixels	7 μ m x 7 μ m square pixels	3.45 x 3.45 μ m square pixels
Maximum Image Resolution (pixels)	1024 x 16376 (16 MP)	2048 x 16376 (32 MP)	4096 x 16376 (64MP)
Electronic Shutter Speed	0.1us to 1,000,000us	0.1us to 1,000,000us	0.1us to 1,000,000us

Vision System

Memory	4 GB
Lens Type	C-Mount only
Trigger	1 opto-isolated, acquisition trigger input
Discrete Inputs	1 opto-isolated, acquisition trigger input 2 dedicated encoder line inputs for quadrature support 1 additional general-purpose input
Discrete Outputs	Up to 2 high-speed outputs
Encoder Specifications	10 – 30 VDC (500 kHz max)
Status LEDs	Pass/Fail LED and Indicator Ring, Network LED and Error LED
Job/Program Memory	7.2 GB non-volatile flash memory; unlimited storage via remote network device
Image Processing Memory	1 GB
Network Communication	2 Ethernet ports, 10/100/1000 BaseT with auto MDIX. IEEE 802.3 TCP/IP Protocol Supports DHCP, static, and link-local IP address configuration
Communication Protocols	TCP/IP, PROFINET, EtherNet/IP, SLMP, ModbusTCP, (S)FTP, RS-232C, IEEE 1588 (CIPSync)
Power Consumption	24 V DC \pm 10%, 2.0 A maximum
Material	Die-cast aluminum and zinc housing
Finish	Painted
Mounting	Four M3 threaded mounting holes. See Accessories for supported mounts Pattern: 38.5 x 8.5 mm (1.52 x 2.60 in)
Weight	In-Sight 3800 with no accessories attached: 570 g (20.10 oz) With 45 mm plastic C-Mount cover (COV-380-CMNT-45): 625 g (22.0 oz.) - no lens included With 60 mm plastic C-Mount cover (COV-380-CMNT-60): 635 g (22.4 oz.) - no lens included With 75 mm plastic C-Mount cover (COV-380-CMNT-75): 650 g (22.9 oz.) - no lens included
Ambient/Environment Temperature	0° C to 40° C (32° F to 104° F)
Storage Temperature	-20° C to 80° C (-4° F to 176° F)
Humidity	<95% non-condensing
Protection	IP67 with all cables properly attached (or the provided connector plug installed) and the IP67-rated cover
Shock (Packaging)	IEC 60068-2-27: 18 shocks (3 shocks in each polarity in each (X, Y, Z) axis) 80 Gs (800 m/s ² at 11 ms, half-sinusoidal) with cables or cable plugs and a 150 gram or lighter lens attached.
Vibration (Shipping and Storage)	IEC 60068-2-6: vibration test in each of the three main axis for 2 hours at 10 Gs (10 to 500 Hz at 100 m/s ² / 15 mm) with cables or cable plugs and a 150 gram or lighter lens attached.
Regulations/Conformity	CE, FCC, KCC, TÜV SÜD NRTL, EU RoHS, China RoHS
